

What to Major in College/University (AI)

A college major is your primary academic field of specialization, dictating about a third of your coursework. The hundreds of options available typically fall into six broad categories:

1. STEM (Science, Technology, Engineering, Math)

- **Computer Science:** Programming, software development, and algorithms.
- **Engineering:** Fields like Mechanical, Civil, or Biomedical Engineering focus on design, physics, and problem-solving.
- **Physical & Life Sciences:** Biology, Chemistry, and Physics.

2. Business

- **Business Administration/Management:** General operations, leadership, and strategy.
- **Finance & Accounting:** Banking, corporate finance, and auditing.
- **Marketing & Communications:** Public relations, advertising, and market research.

3. Arts & Humanities

- **Literature & Languages:** English, creative writing, or linguistics.
- **Visual & Performing Arts:** Theater, music, graphic design, and fine arts.
- **History & Philosophy:** Broad critical thinking and cultural studies.

4. Social Sciences

- **Psychology:** The study of the human mind and behavior.

- **Political Science & International Relations:** Government, law, and global affairs.
- **Economics:** The study of markets, resources, and decision-making.

5. Health & Medicine

- **Nursing:** Direct patient care and clinical practice.
- **Healthcare Administration:** The business and operational side of hospitals and clinics.
- **Public Health:** Community health, policy, and disease prevention.

6. Public & Social Services

- **Education:** Teacher preparation and early childhood development.
- **Social Work:** Community advocacy, counseling, and social justice.
- **Criminal Justice:** Law enforcement, corrections, and legal studies.

7. Where to Go and Why
