Audiences were delighted to hear their favorite Dickens’ characters speak with English accents. After seventy-six readings, the exhausted author boarded a ship for England. When his fellow passengers asked him to read, he said, I’d rather be behind bars!

I had overslept at the hotel, missing breakfast, and had to leap into my clothes. I couldn't find a cab and had to drag my overweight bag eight blocks to the Central Bus Station. I had huge difficulty persuading the staff at the bank on Johansgate Street to cash sufficient traveler's checks to pay the 1,200-kroner bus fare. They simply could not understand that the William McGuire Bryson on my passport and the Bill Bryson on my traveler's checks were both me. Now here I was arriving at the station two minutes before departure, breathless and steaming from the endless uphill struggle that is my life, and the girl at the ticket counter was telling me that she had no record of my reservation.

Flood waters are dangerous. The force of a few inches of water can toss you to the ground. While camping, just keep your radio turned on and tuned to a weather station. Tons of water miles away can reach and swallow you in a few minutes. If there’s a flood, just get out of the car. Cars can be easily swept away in just two feet of water. If you have limited time, take only family medicines, blankets and a battery-powered radio with you. Don’t wait until the last minute to leave, hoping to save your possessions. Save your life instead.

As far back as I can remember, I’ve heard about the importance of a positive attitude and the powerful effect it could have on my life. I heard it from my parents, teachers, coaches, and supervisors over the years. How many times in your life have you been encouraged to have a positive attitude? Although attitude plays an important role in everyone’s life, many people don’t realize the influence it has on their performance at work and on their relationships. The attitude that you carry around makes an incredible difference in your life. It can be a powerful tool for positive action. Or it can be a poison that weakens your ability to fulfill your potential. Your attitude dictates whether you are living life or life is living you. Attitude determines whether you are on the way or in the way.

Human capital consists of the skills and knowledge that an individual uses to produce goods and services. Human capital is developed by investing time, money and energy in the acquisition of new skills that enable us to be more productive. Perhaps the outstanding characteristic of my nine-year-old child is the fact that he is emerging from a long, strong occupation with his mother. Whereas at eight he could admit the presence of Mother, now he often seems to resent her presence and her demands. At eight he counted on his mother. Or he was related strongly and warmly to his mother. This nine-year-old child isn’t willing to ask others for help. In addition, he is eager to achieve something for himself. He has become a self-starter and, once started, wishes to continue in his own way, at his own time, in his own direction.

My child at nine is more (A) and (B) than at eight.

Markets enable buyers and sellers to exchange goods and services. A market may be a place where buyers put their money down and carry away whatever it is they have bought - groceries from a supermarket, for example. But a market does not have to be a place. It can be something more abstract. Take the real-estate market, for example. It is not possible to go and look at the real-estate market; instead, the real-estate market is a complicated set of arrangements involving real-estate sales offices, web pages, and even information exchanged by neighbors talking over back fences. Whether concrete or abstract, markets help people exchange goods and services.

From the 5th to the 15th centuries, Europeans with tooth problems went to people called barber-surgeons. These people performed many services, including cutting hair, pulling teeth and treating medical conditions. Dental treatment improved during the 14th and 15th centuries as they increased their knowledge about teeth. Modern dentistry began in the 1700s in France. That was when Pierre Fauchard published his book called The Surgeon Dentist. It was the first book about dental science. The book provided information about dental problems for other dentists to use. And it described ways to keep teeth healthy. Pierre Fauchard is considered the father of modern dentistry.
