This product is not a toy; it is an instrument of control. In order to use it properly and become an expert wizard or witch, you will have to practice using it. Once you are the wand’s master, you will need to train it to control things in your home. Only then will you be ready to perform your magic.

Practising magic
Your wand tells you what it is doing by pulsing. When you 3D print your wand, it is automatically in Practice Mode. Whenever you leave the wand for one minute it falls asleep. If you pick it up and move it, it wakes up and it pulses with three beeps. Then you know you are ready to begin practicing.

In Practice Mode the wand pulses a set number of times for each gesture, to help you get used to using the wand and make sure that you are doing the gestures correctly. For the best results, hold the wand lightly in the hand, steady and level, and make slow, positive movements.

1. Rotate clockwise
2. Rotate anticlockwise
3. Flick upwards
4. Flick downwards
5. Flick left
6. Flick right
7. Tap on top
8. Tap on side
9. Big Swish
10. Push forward
11. Double tap on top
12. Double tap on side

Teaching the wand
Your wand can learn almost any gesture, so fasten your remote control. You have to teach it each code, but it’s a quick lesson.

Entering learning mode:
Hold the wand steadily, pointing upwards at one hand and double tap quickly on the cross-section area with the index finger. You may have to start by using your other hand to do the tap. To tap on the side of the wand, wait half a second and then without changing your grip rotate your hand and the wand, one quarter turn, then pulse briefly and tap with your index finger on the side of the cross-section of the wand. Once you have got the hang of the single tap, you are ready to try the double tap. You can see what is going on if you just double click it a mouse.

Performing magic
Once you have taught your wand some remote control functions, all you have to do is work your magic, use the wand instead of your remote control. And with just a flick of the wrist and a bit of practice you’ll be able to change channels, turn up the volume, phone, or turn the lights on and off whenever you want.

Instructions & Methods for the Skilful Art of Wand Use
Important things you should know to become proficient in the art of wand use.
