

## Getting Started

Ok, so you're ready to get started with your first application for the MySpace Platform.

We have assembled this page to provide you with the essential information you will need to review before you can start building. If you have any questions, you can find us in the [Forums](#).

### Temporary limitations

There are two **temporary** limitations currently in place:

1. You will need to fill out a short form before accessing the platform. [Click here](#) to fill out the form.
2. You can only add your app to a maximum of 5 profiles for now.

### Prerequisites

To access the platform you will need:

1. Your MySpace account. If you don't have one [sign up](#) here.
2. Once you are signed in request access.

Once approved you are ready to start building.

### Start Building

- [Anatomy of a MySpace App](#) - an overview of possibilities!
- [Javascript API, Server API or ActionScript](#) - check the options before choosing what to build
- [Tools you need to build a MySpace Application](#)
- [Developer Introduction](#)
- [API Documentation](#)
- [Strategies for creating multiple applications](#) - those planning on developing multiple applications for the MySpace platform, especially commercial app builders, will find useful information here

### Testing MySpace Apps

- [Everything you need to know about testing and quality assurance](#) - checking your MySpace application
- [Submission process](#) - how to submit your application to MySpace
- [Why can't I...?](#) - an overview of what we don't allow in MySpace application
