

OpenSocial JS Library

Library: activity.js

Overview

Representation of an activity.

Constructors

`opensocial.Activity()`

methods

- [getId\(\)](#)
- [getField\(key\)](#)
- [setField\(key, data\)](#)

`opensocial.Activity.Field()`

properties

- [ID](#)
- [EXTERNAL_ID](#)
- [USER_ID](#)
- [APP_ID](#)
- [STREAM_TITLE](#)
- [STREAM_URL](#)
- [STREAM_SOURCE_URL](#)
- [STREAM_FAVICON_URL](#)
- [TITLE](#)
- [BODY](#)
- [URL](#)
- [MEDIA_ITEMS](#)

- [POSTED_TIME](#)

`opensocial.Activity.MediaItem()`

methods

- [getField](#)(key)
- [setField](#)(key, data)

`opensocial.Activity.MediaItem.Type()`

properties

- [IMAGE](#)
- [VIDEO](#)
- [AUDIO](#)

`opensocial.Activity.MediaItem.Field()`

properties

- [TYPE](#)
- [MIME_TYPE](#)
- [URL](#)

Functions

[opensocial.Activity.getId\(\)](#)

Gets an ID that can be permanently associated with this activity.

returns

String The ID

[opensocial.Activity.getField\(key\)](#)

Gets the activity data that's associated with the specified key.

parameters

String key The key to get data for; see the [Field](#) class for possible values

returns

String The data

[opensocial.Activity.setField\(key, data\)](#)

Sets data for this activity associated with the given key.

parameters

String key The key to set data for

String data The data to set

[opensocial.Activity.MediaItem.getField\(key\)](#)

Gets the media item data that's associated with the specified key.

parameters

String key The key to get data for; see the [Field](#) class for possible values

returns

String The data

[opensocial.Activity.MediaItem](#).setField(key, data)

Sets data for this media item associated with the given key.

parameters

String key The key to set data for

String data The data to set

Objects

[opensocial.Activity.Field](#).ID

A string ID that can be permanently associated with this activity.

[opensocial.Activity.Field](#).EXTERNAL_ID

A string ID associated with this activity that was generated by the posting app externally.

[opensocial.Activity.Field](#).USER_ID

The string ID of the user who this activity is for.

[opensocial.Activity.Field](#).APP_ID

A string specifying the application that this activity is associated with.

[opensocial.Activity.Field](#).STREAM_TITLE

A string specifying the title of the stream.

[opensocial.Activity.Field](#).STREAM_URL

A string specifying the stream's URL.

[opensocial.Activity.Field](#).STREAM_SOURCE_URL

A string specifying the stream's source URL.

[opensocial.Activity.Field](#).STREAM_FAVICON_URL

A string specifying the URL for the stream's favicon.

[opensocial.Activity.Field](#).TITLE

A string specifying the title of an activity; the only field that is guaranteed to display when rendering.

[opensocial.Activity.Field](#).BODY

A string specifying the full text of an activity.

[opensocial.Activity.Field](#).URL

A string specifying the URL that represents this activity.

[opensocial.Activity.Field](#).MEDIA_ITEMS

Any photos, videos, or images that should be associated with the activity. Higher priority ones are higher in the list. The data has type `Array< MediaItem>`.

[opensocial.Activity.Field](#).POSTED_TIME

A string specifying the time at which this activity took place in milliseconds since the epoch.

[opensocial.Activity.MediaItem.Type](#).IMAGE

[opensocial.Activity.MediaItem.Type](#).VIDEO

[opensocial.Activity.MediaItem.Type](#).AUDIO

[opensocial.Activity.MediaItem.Field](#).TYPE

The type of media, specified as a [MediaItem.Type](#) object.

[opensocial.Activity.MediaItem.Field](#).MIME_TYPE

The MIME type of media, specified as a String.

[opensocial.Activity.MediaItem.Field.URL](#)

A string specifying the URL where the media can be found.
