Communication No. 1445

Single and Pair Skating

I. Technical Rules Clarifications and Changes for the season 2007-2008

1. Spiral Sequences (Single & Pair Skating, Short Program & Free Skating)

A Spiral is a position with one blade on the ice and the free leg (including knee and foot) higher than the hip level. Spiral positions are classified according to the skating leg (right, left), edge (outside, inside), direction (forward, backward) and position of the free leg (backward, forward, sideways).

Pattern of the Spiral Sequence can be any combination of curves (on edges - spiral positions on a straight line are ignored and not counted in the number of positions). Only the first 3 attempted positions are to be considered for Level features.

If all these positions are executed with assistance of the hand/arm or in the Short Program (both Singles and Pairs) there is no change of foot, Level can not be more than 1 (but GOE is not restricted). Minimum of 3 seconds in each position.

Unsupported spiral position with the free leg sideways or forward is no longer a Level feature by itself, it can be included in the number of executed positions, but considered a Level feature only when it is a difficult variation of position (affects the core body and balance).

2. Spins (Single & Pair Skating, Short Program & Free Skating)

Positions: There are 3 basic positions: camel (free leg backwards with the knee higher than the hip level, however Layback and Biellmann are still considered as upright spins), sit (buttocks not higher than the knee of the skating leg), upright (any position with extended skating leg which is not a camel position) and intermediate positions (all positions that according to the above definitions are not camel, sit or upright).

Spin combinations: the number of revolutions in intermediate positions is counted in the total number of revolutions; intermediate positions can be considered as difficult variations in cases the definition of such variations is fulfilled, but going to one of these positions is not considered as a change of position which can only be from one basic position to another basic position. Spin Combination in the Short Program must have at least 2 revolutions in every basic position.

Spin in one position and Flying Spin: intermediate positions are allowed, counted in the total number of revolutions required by the Rules, but are not valid for Level features.

In any spin change of edge can be counted only if done in a basic position.

3. Spins, Single Free Skating

All Spins must be of a different character (must have different abbreviations). Any Spin with the same abbreviation as the one executed before will be deleted by computer (but will occupy a spinning box).

4. Jumps, Flip and Lutz (Single & Pair Skating, Short Program & Free Skating)

In obvious cases of starting from the wrong edge the Technical Panel will indicate this error to the Judges who must reduce their GOE accordingly.

5. Jump Combination (Single and & Pair Skating, Short Program & Free Skating)

The element remains a Jump Combination even when there are 2 three turns in between the jumps with a slight touch down (without weight transfer).

6. Jump Sequence (Single and Pair Free Skating)

A jump sequence may consist of any number of jumps of any number of revolutions that must be linked by non-listed jumps and hops immediately following each other while maintaining the jump rhythm (knee); there can be no three turns/Mohawks during the sequence; there can be no crossovers or stroking during the sequence.

If this definition is not fulfilled, two solo jumps will be called.

7. Jump Combinations and Sequences (Single and Pair Free Skating)

If a skater or one or both partners fall/step out of the first jump and immediately after that execute another jump, this continuation will be ignored by the Technical Panel (like in a Jump Combination of Singles Short Program). The element will be called "First Jump + Sequence" or "First Jump + Combo" in cases of one partner executing a Jump Combination. Judges will evaluate the quality of the element(s) really executed.

8. Jumps, Single Free Skating

A Double Axel can not be included more than three times in total in a Single's Free Program (as a Solo Jump or a part of Combination/Sequence).

9. Lifts, Pairs Short Program and Free Skating

Holds: Hand-to-Hand, Hand-to-Hip, Hand-to-Waist and Hand-to-Armpit. A change of hold means going from one of these holds to another or from one hand to another in a one hand hold (one full revolution with each hold).

Positions: Upright (lady's upper body vertical), Star (lady's position sideways with upper body parallel to the ice) and Platter (lady's position flat, facing up or down with upper body parallel to the ice). A change of position means going from one of these positions to another (one full revolution in each position).

If a change of hold and a change of lady's position are executed at the same time, only one Level feature will be awarded.

The Lift's Group is determined by the Hold at the moment the Lady passes the Man's shoulder. Full extension of the lifting arm(s) is not mandatory in Groups 1 and 2.

10. Death Spiral, Pairs Short Program and Free Skating

Lady's position: the lady's lowest hip and head position should be not higher than the lady's skating knee. Any part of the Death Spiral with a higher lady's position is not valid for Level features.

Man's position: for at least one full revolution the man should stay in a low pivot position (this is when his buttocks are not higher than the knee of the pivot foot). A Level of a Death spiral without one full revolution in the described man's position can not be more than 1.

11. Clarification on Short Program Pair Spin Combination (Rule 513, paragraph 5)

"The rotation must be continuous and no stop is permitted except a short stop when changing direction."

12. Clarification on time Deduction

There seems to be some misunderstanding based on different wording of Rule 353, paragraph 1) l) (ii) (deduction for time violation -1,0 for every 5 seconds lacking or in excess) and Rule 501, paragraph 2 (deduction for time violation -1,0 for **up** to every 5 seconds lacking or in excess). Both wordings mean the same, we would just like to clarify that the second one is more precise.

13. Amendments to Rule 551

1. In the case of the Short Program and Free Skating, if there is an interruption or stop in the music, or circumstances arise which jeopardize the safety of the Competitor on account of unexpected damage to his clothing or equipment which impedes his skating, the Competitor must stop skating at the signal of the Referee. The Competitor then shall continue immediately from the point of interruption, if the circumstances which caused the Competitor to stop can be rectified without delay. If that is not possible, a period of up to three (3) minutes before the continuation will be allowed. The three (3) minutes time period commences immediately after the Referee has stopped the performance with a loud signal. The same applies to the situation when the Competitor interrupts the program on account of unexpected damage to his clothing or equipment without the signal of the Referee. However, if the tempo or quality of the music is deficient, no restart may be made if the Competitor fails to inform the Referee within 30 seconds after the start.

2. If, in the opinion of the Referee, medical attention is required, the Referee must stop the performance and allow the Competitor to continue immediately from the point of interruption or, if that is not possible, allow a period of up to three (3) minutes before the continuation.

3. No restarts of the whole program are allowed.

4. If a Competitor is unable to complete the program no marks are to be awarded. The same applies to the situation when a Competitor has been given the opportunity to continue the program from the point of interruption and once more is unable to complete the program.

14. Clarification on Rule 353, paragraph 1) g) vi), factor 1.1 for jump elements and throw jumps started in the second half of the Singles and Pairs Free Program

The second half commences in the middle of the required time without taking into account plus or minus 10 seconds allowance (e.g. if the allowed duration is 4 min. plus or minus 10 sec., the middle of a program will be 2 min. independent of the actual duration of this program).

II. Levels of Difficulty of Single/Pair elements

The features required for the Levels of Difficulty were updated according to the Charts below:

CLARIFICATIONS: LEVELS OF DIFFICULTY SINGLES – STEPS, SPIRALS, SPINS, season 2007-2008

STEP SEQUENCES

Turns: three turns, twizzles, brackets, loops, counters, rockers.

Steps: running steps, toe steps, chasses, mohawks, choctaws.

Various types of turns and steps must be balanced in their distribution throughout the sequence.

Variety: Must include at least 4 different types of turns and 2 different types of steps. Each of these types of turns and steps must be executed at least twice during the sequence.

Complexity: Must include at least 5 different types of turns and 3 different types of steps all executed at least once in both directions.

SPIRAL SEQUENCES

A Spiral is a position with one blade on the ice and the free leg (including knee and foot) higher than the hip level. Spiral positions are classified according to the skating leg (right, left), edge (outside, inside), direction (forward, backward) and position of the free leg (backward, forward, sideways). Pattern of the Spiral Sequence can be any combination of curves (on edges - spiral positions on a straight line are ignored and not counted in the number of positions). Only the first 3 attempted positions are to be considered for Level features. If all these positions are executed with assistance of the hand/arm or in the Short Program there is no change of foot, Level can not be more than 1 (but GOE is not restricted). Minimum of 3 seconds in each position.

Difficult Spiral Variations are variations that affect the core body position and balance. Only these variations can increase the Level.

Change of position in Spirals: A change of free leg position or direction of skating and a change of edge must be done not at the same time in order to be counted as features for a Level (3 sec. hold before and after the change of position and 3 sec. hold before and after the change of edge are mandatory).

SPINS

Positions. There are 3 basic positions: camel (free leg backwards with the knee higher than the hip level, however Layback and Biellmann are still considered as upright spins), sit (buttocks not higher than the knee of the skating leg), upright (any position with extended skating leg which is not a camel position) and intermediate positions (all other positions).

Spin combinations: the number of revolutions in intermediate positions is counted in the total number of revolutions; intermediate positions can be considered as difficult variations in accordance with the definition of such positions, but going to one of these positions is not considered as a change of position which can only be from one basic position to another basic position.

Spin in one position and Flying Spin: intermediate positions are allowed, counted in the total number of revolutions required by the Rules, but are not valid for Level features.

In any spin change of edge can be counted only if done in a basic position.

Spin Variations. Simple: A simple variation of position is a movement of a body part, leg, arm, hand or head, which enhances but does not change the basic position of the main body core. A simple variation DOES NOT increase the Level. **Difficult:** A difficult variation is a movement of a body part, leg, arm, hand or head, which requires more physical strength or flexibility and that, has an affect on the balance of the main body core. Only these variations can increase the Level.

Remarks:

- Biellmann position counts as a feature that can increase the Level only in one spin in the Short Program and in two spins in Free Skating; while doing that, the first spin(s) is (are) taken into account;
- for camel, sit and layback positions once the position has been established a clear increasing of speed will be considered a difficult variation;
- camel spin includes position with the upper body turned upwards approximately 180° (upside down position);
- in any spin a clear jump within a spin started and landed on the same foot (at least 2 revolutions before and after the jump) will be considered as a difficult variation;
- in order to be counted as a Level feature backward entrance requires at least 2 rev. on a backward outside edge.

Spinning on both edges: Spinning on both edges in order to be counted as a feature for a Level requires at least 2 full rev. on one edge followed by at least 2 full rev. on another edge in the same basic position (sit, camel, upright).

Spins in both directions: Execution of spins in both directions (clockwise and counter clockwise) that immediately follow each other will be rewarded by counting this as an additional feature in all Levels. A minimum of 3 revolutions in each direction is required. A Spin executed in both directions (clockwise and counter clockwise) as above is considered as one Spin.

Change of foot. Simple (can not increase the Level): does not require significant strength and skill, e.g. a step over, a small hop, a hop/jump from or into an upright position. **Difficult** (can increase the Level): requires significant strength and skill, e.g. a clear jump over or a toe-Arabian or any form of a “butterfly” from sit or camel position directly into sit or camel position.

Remark: to be considered, a change of foot in a spin requires at least 3 revolutions before and after the change.

Flying spins: in case of an obvious “step over” (instead of a jump) Level can not be more than 1; in a flying sit spin “landing on the same foot as take off or changing foot on landing” is counted as a Level feature only when the sit position is attained in the air.

LEVELS OF DIFFICULTY PAIRS, CLARIFICATIONS, SEASON 2007-2008

	Carry	Two hand Carry up to 3 seconds with no revolution of the man.
Simple:	Take off	Includes but is not limited to change of hand hold on ascent of lift.
	Landing	Different landing foot, change of hold on descent.
	Carry	Duration at least 3 seconds.
Difficult: Take Off		Includes but is not limited to: Somersault take off, dance lift going immediately into a Pair lift take off without the lady touching the ice in between the two lifts, one hand take off, <u>Spread-Eagle, executed by one or both partners as the entry curve.</u>
	Landing	Variation of the difficult landing which includes but is not limited to: Somersaults, variation in holds, partner positions and /or direction of landing, one hand landing, <u>Spread-Eagle position of the man during dismounting.</u>
	Carry	Includes at least one of the following features: during the carry the Man for at least <u>3 seconds</u> skates on 1 foot <u>or holds the partner on one arm</u> or performs crossovers or performs Spread Eagle or a similar move.
	Position	A movement of a leg (s), arm (s), or upper body which requires more physical strength or flexibility and that has an effect on the balance of the main body core. Only these variations can increase the Level.
	One hand hold	At least one full revolution in this hold. <u>In the SP – rotation of the man using one hand hold can be counted not more than twice.</u> <u>In FS – rotation of the man using one hand hold can be counted 3 times in one lift only (the first that will have 3 rev. with one hand hold). All other lifts in the FS can't have more than 2 Level features for one hand hold.</u>
	Change of hold or lady's position	<u>requires one full revolution before and after this change. If a change of hold and a change of lady's position are executed at the same time, only one Level feature will be awarded.</u>

Step sequences

Turns:	Three turns, brackets, twizzles, <u>loops</u> , rockers, counters.
Steps:	Running steps, toe steps, chocktaws, chasses, mohawks. <u>In order to be taken into account for a possible higher Level a variety of turns and steps must be balanced in their distribution throughout the sequence; the workload between both partners must be even.</u>
Variety:	Must include <u>at least four</u> different types of turns and <u>at least two</u> different types of steps. <u>Each of these types of turns and steps must be executed at least twice during the sequence.</u>

Spiral sequences

Spiral positions are classified according to the skating leg (right, left), edge (outside, inside) and direction (forward, backward) as well as position of the free leg (backward, forward, sideways). Pattern of the Spiral Sequence can be any combination of curves (on edges - spiral positions on a straight line are ignored and not counted in the number of positions). Only the first 3 attempted positions are to be considering for Level features. If all these positions are with assistance of the hand/arm or in the Short Program there is no change of foot by both partners, Level can not be more than 1 (but GOE is not restricted). Minimum of 3 sec. in each position.

Simple variation: A spiral position with limited leg or arm movement (not affecting main body core position and independent from skating edge or direction). A simple variation DOES NOT increase the Level.

Difficult variation: This is a variation that affects the main body core and balance. Only these variations can increase the Level.

Spins

Positions. There are 3 basic positions: camel (free leg backwards with the knee higher than the hip level, however Layback and Biellmann are still considered as upright positions), sit (buttocks not higher than the knee of the skating leg), upright (any position with extended skating leg which is not a camel position) and intermediate positions (all other positions).

Solo and Pair Spin combinations: the number of revolutions in intermediate positions is counted in the total number of revolutions; intermediate positions can be considered as difficult variations in accordance with the definition, but going to one of these positions is not considered as a change of position which can only be from one basic position to another basic position.

In any spin change of edge can be counted only if done in the same basic position.

Definition of Spin Variations (all comments are related to both partners)

Simple Variation: A movement of a leg, arm, leg, hand or head which enhances, but does not change the basic position of the main body core. A simple variation DOES NOT increase the Level.

Difficult variation: A movement of a leg, arm, hand or head which requires more physical strength or flexibility and that has an effect on the balance of the main body core. Only these variations can increase the Level.

Spins in both directions: Execution of spins in both directions (clockwise and counter clockwise) that immediately follows each other will be rewarded by counting this as an additional feature for every spin performed. A minimum of 3 revolutions in each direction is required. A Spin executed in both directions (clockwise and counter clockwise) as above is considered as one Spin.

Backward entrance: in any Spin backward entrance requires at least 2 rev. on a backward outside edge in order to be counted as a Level Feature.

Death Spiral

Definition. Lady's position: the lady's lowest hip and head should be not higher than the lady's skating knee. Any part of the Death Spiral with a higher lady's position is not valid for Level features. Man's position: for at least one full revolution the man should stay in a low pivot position (this is when his buttocks are not higher than the knee of the pivot foot). A Level of a Death spiral without one full revolution in the described man's position can not be more than 1.

Change of arm hold by the lady or man requires one full revolution in the death spiral position before and after this change. However if both partners change arms at the same time, only one Level feature will be awarded.

Difficult Entry, exit: Skater(s) must demonstrate positions that affect the main body core and balance on the entry curve. Only these positions can be counted for Level features. An example of a difficult exit also: Lady exits immediately into a lift (dance or other) or into a jump.

Entry commences at the beginning of the entry curve when both partners are already on one foot on the edge of the death spiral.

Exit starts when the Man starts bending his "holding" arm in the elbow and **ends** when the Lady comes to the vertical position.

IV. Changes in the Scales of Values

The following changes in the Scale of Values (SOV) were accepted:

1. The Base Value of the Double Axel 3.3 will be increased to 3.5 so that this value will not be lower than the Base Value of the Spin Combination with Change of foot and Spiral Sequence of Level 4. Additions and reductions for plus and minus GOEs remain as in the season 2006-2007.

2. The Base Values of all types and Levels of Triple and Quad Twist Lifts will be increased by 0.5 to encourage the skaters who can execute these difficult elements. The additions and reductions for plus or minus GOEs remain as in the season 2006-2007.

3. The Base Values of all Levels of the Reverse Lasso Lift will be increased by 0.5 and will be equal to the Base Values of the corresponding Levels of the Axel (Side by Side) Lasso Lift to encourage the skaters who can execute these difficult elements. The additions and reductions for plus or minus GOEs remain as in the season 2006-2007.
