1. 다음을 듣고, 남자가 하는 말의 목적으로 가장 적절한 것을 고르시오.
   ① 발명 대회 참가 신청 마감일 변경을 안내하려고
   ② 수업 과제의 온라인 제출 방법을 설명하려고
   ③ 학교 홈페이지 운영 도우미를 모집하려고
   ④ 발명 아이디어 우수 사례를 소개하려고
   ⑤ 발명가 초청 특별 강연을 홍보하려고

2. 대화를 듣고, 여자의 의견으로 가장 적절한 것을 고르시오.
   ① 보고서 주제는 구체적이어야 한다.
   ② 도표 활용은 자료 제시에 효과적이다.
   ③ 설문 대상에 따라 질문을 달리해야 한다.
   ④ 설문 조사자를 위한 사전 교육이 필요하다.
   ⑤ 보고서 작성 시 도표 제시 순서에 유의해야 한다.

3. 대화를 듣고, 두 사람의 관계를 가장 잘 나타낸 것을 고르시오.
   ① 화가 - 기자
   ② 작곡가 - 가수
   ③ 시인 - 교사
   ④ 영화감독 - 배우
   ⑤ 무용가 - 사진작가

4. 대화를 듣고, 그림에서 대화의 내용과 일치하지 않는 것을 고르시오.

5. 대화를 듣고, 여자가 남자로 위해 할 일로 가장 적절한 것을 고르시오.
   ① 저작권 확인하기
   ② 포스터 인쇄하기
   ③ 프린터 구매하기
   ④ 파일 전송하기
   ⑤ 커피 맛이

6. 대화를 듣고, 남자가 지불할 금액을 고르시오. [3점]
   ① $54
   ② $55
   ③ $60
   ④ $63
   ⑤ $70

7. 대화를 듣고, 동아리 봉사 활동이 연기된 이유를 고르시오.
   ① 기부받은 후 정리 시간이 더 필요해서
   ② 동아리 홍보 동영상을 제작해야 해서
   ③ 중간고사 기간이 얼마 남지 않어서
   ④ 동아리 정기 회의를 개최해야 해서
   ⑤ 기부 행사 참가자가 부족해서

8. 대화를 듣고, Annual Charity Baseball Game에 관련 언급되지 않은 것을 고르시오.
   ① 참가 선수
   ② 일시
   ③ 입장료
   ④ 기념품
   ⑤ 장소

   ① 1995년에 처음 개최되었다.
   ② 필요일에는 열리지 않는다.
   ③ 음화의 주제는 예술과 기술의 결합이다.
   ④ 연일 관람객 수를 100명으로 제한한다.
   ⑤ 예매를 통해 할인을 받을 수 있다.

10. 다음 표를 보면서 대화를 듣고, 여자가 등록할 강좌를 고르시오.

11. 대화를 듣고, 남자의 마지막 말에 대한 여자의 응답으로 가장 적절한 것을 고르시오.
   ① I’ll be back tomorrow.
   ② You liked the food there.
   ③ I go to the gym every day.
   ④ You should be here by six.
   ⑤ We finished dinner already.

12. 대화를 듣고, 여자의 마지막 말에 대한 남자의 응답으로 가장 적절한 것을 고르시오.
   ① All right. I’ll take the bus then.
   ② No. My bicycle is broken again.
   ③ No problem. I’ll give you a ride.
   ④ Don’t worry. I’m already at school.
   ⑤ Indeed. I’m glad it’s getting warmer.
영어 영역

13. 대화를 듣고, 남자의 마지막 말에 대한 여자의 응답으로 가장 적절한 것을 코르시오. [3점]

Woman: ____________________________
① Absolutely. I was impressed after reading this script.
② No doubt. I think I acted well in the last comedy.
③ Great. I’ll write the script for your new drama.
④ I’m sorry. I’m not able to direct the movie.
⑤ Okay. I’ll let you know my decision soon.

14. 대화를 듣고, 여자의 마지막 말에 대한 남자의 응답으로 가장 적절한 것을 코르시오. [3점]

Man: ____________________________
① That’s okay. You can reserve another place.
② I see. I should hurry to join your company event.
③ Why not? My company has its own sports facilities.
④ I agree. We should wait until the remodeling is done.
⑤ Thanks. I’ll call now to see if they’re available that day.

16. 여자가 하는 말의 주제로 가장 적절한 것은?
① reasons why chemicals are harmful to plants
② ways that plants protect themselves from danger
③ difficulties in preventing plants from overgrowing
④ tips for keeping dangerous insects away from plants
⑤ importance of recognizing poisonous plants in the wild

17. 언급된 식물이 아닌 것은?
① roses ② tomato plants ③ clovers ④ cherry trees ⑤ walnut trees

이제 들기 문제가 끝났습니다. 18번부터는 문제의 자기에서 따라 답을 하시기 바랍니다.
21. 밑줄 친 journey edges가 다음 글에서 의미하는 바로 가장 적절한 것은? [3점]

Many ancillary businesses that today seem almost core at one time started out as journey edges. For example, retailers often boost sales with accompanying support such as assembly or installation services. Think of a home goods retailer selling an unassembled outdoor grill as a box of parts and leaving its customer’s mission incomplete. When that retailer also sells assembly and delivery, it takes another step in the journey to the customer’s true mission of cooking in his backyard. Another example is the business-to-business service contracts that are layered on top of software sales. Maintenance, installation, training, delivery, anything at all that turns do-it-yourself into a do-it-for-me solution originally resulted from exploring the edge of where core products intersect with customer journeys.

* ancillary: 보조의, 부차적인  ** intersect: 교차하다
① requiring customers to purchase unnecessary goods
② decreasing customers’ dependence on business services
③ focusing more on selling end products than components
④ adding a technological breakthrough to their core products
⑤ providing extra services beyond customers’ primary purchase

22. 다음 글의 요지로 가장 적절한 것은?

Official definitions of sport have important implications. When a definition emphasizes rules, competition, and high performance, many people will be excluded from participation or avoid other physical activities that are defined as “second class.” For example, when a 12-year-old is cut from an exclusive club soccer team, she may not want to play in the local league because she sees it as “recreational activity” rather than a real sport. This can create a situation in which most people are physically inactive at the same time that a small number of people perform at relatively high levels for large numbers of fans — a situation that negatively impacts health and increases health-care costs in a society or community. When sport is defined to include a wide range of physical activities that are played for pleasure and integrated into local expressions of social life, physical activity rates will be high and overall health benefits are likely.

① 육식동물의 기반은 경기 자체를 즐긴 때 향상된다. ② 공정한 승부를 위해 투기적인 경기 규칙이 필요하다. ③ 스포츠의 대중화는 스포츠 산업의 정의를 바꾸고 있다. ④ 스포츠의 정의는 신체 활동 참여의 증진에 영향을 미친다. ⑤ 활발한 여가 활동은 원만한 대인 관계 유지에 도움이 된다.

23. 다음 글의 주제로 가장 적절한 것은?

Problem framing amounts to defining what problem you are proposing to solve. This is a critical activity because the frame you choose strongly influences your understanding of the problem, thereby conditioning your approach to solving it. For an illustration, consider Thibodeau and Broditsky’s series of experiments in which they asked people for ways to reduce crime in a community. They found that the respondents’ suggestions changed significantly depending on whether the metaphor used to describe crime was as a virus or as a beast. People presented with a metaphor comparing crime to a virus invading their city emphasized prevention and addressing the root causes of the problem, such as eliminating poverty and improving education. On the other hand, people presented with the beast metaphor focused on remediations: increasing the size of the police force and prisons.

① importance of asking the right questions for better solutions ② difficulty of using a metaphor to find solutions to a problem ③ reasons why problem framing prevents solutions from appearing ④ usefulness of preventive measures in reducing community crime ⑤ effect of problem framing on approaching and solving problems

24. 다음 글의 제목으로 가장 적절한 것은?

A common error in current Darwinian thinking is the assumption that “selfish genes” are the prime mover in evolution. In strict Darwinism the prime mover is environmental threat. In the absence of threat, natural selection tends to resist change. It is un-biological to “explain” behavioural change as resulting from genetic change or the ex vacuo emergence of domain-specific brain modules. Evolutionary psychologists surely know why brains evolved: as Cosmides and Tooby point out, brains are found only in animals that move. Brains are behavioural organs, and behavioural adaptation, being immediate and non-random, is vastly more efficient than genetic adaptation. So, in animals with brains, behavioural change is the usual first response to environmental threat. If the change is successful, genetic adaptation to the new behaviour will follow more gradually. Animals do not evolve carnivore teeth and then decide the problem, thereby conditioning your approach to solving it. For an

① Which Adapts First, Behaviour or Genes? ② The Brain Under Control of Selfish Genes ③ Why Animals Eat Meat: A Story of Survival ④ Genes Always Win the Battle Against Nature! ⑤ The Superior Efficiency of Genetic Adaptation

* ex vacuo: 무(無)에서의  ** carnivore: 육식 동물

① Which Adapts First, Behaviour or Genes? ② The Brain Under Control of Selfish Genes ③ Why Animals Eat Meat: A Story of Survival ④ Genes Always Win the Battle Against Nature! ⑤ The Superior Efficiency of Genetic Adaptation

Note: Due to rounding, the percentages may not sum to 100%.

The above table shows global plastic waste generation by industry in 2015. ① The sector that generated plastic waste most was packaging, accounting for 46.69% of all plastic waste generated. ② The textiles sector generated 38 million tons of plastic waste, or 12.58% of the total plastic waste generated. ③ The consumer and institutional products sector generated 37 million tons of plastic waste, and the amount was more than twice that of the plastic transportation sector generated. ④ The electrical and electronic sector generated just as much plastic waste as the building and construction sector did, each sector accounting for 8.60% of the total plastic waste generation. ⑤ Only one million tons of plastic were generated in the industrial machinery sector, representing less than 0.50% of the total plastic waste generated.

26. William McDougall에 관한 다음 문의 내용과 일치하지 않는 것은?

Born in Lancashire, England, in 1871, William McDougall left his mark on experimental and physiological psychology. After receiving a degree in natural sciences in Cambridge University, he became interested in human behavior. He believed human behavior to be based on three abilities—intellect, emotion, and will. Being a hardworking scholar, he held academic positions in several universities in England. He also wrote many books on psychology including the well-known Introduction to Social Psychology. In 1920, he published The Group Mind opposing mechanistic interpretations of human behavior. However, The Group Mind was poorly received when published. Somewhat disappointed, he moved to the United States in the same year to be a professor at Harvard University. Seven years later, he moved to Duke University, where he developed a psychology department and continued various research. Today many people read his books, and psychologists celebrate his intellectual achievements.

① Cambridge University에서 학위를 받았다.
② 인간 행동이 세 가지 능력에 근거한다고 믿었다.
③ The Group Mind는 출판되었을 때 매우 인정받았다.
④ Duke University에서 다양한 연구를 계속하였다.
⑤ 오늘날 심리학자들은 그의 지적 업적을 기리다.

27. Singing Tommy 쇼용에 관한 다음 문의 내용과 일치하지 않는 것은?

Singing Tommy

Congratulations! Tommy is now your singing friend. Read these instructions to learn how to play with and care for him. Tommy sings to you anytime, anywhere. An Internet connection is not required to play the songs!

Before Use
1. Remove the protective film covering Tommy’s eyes.
2. Insert two AA batteries into the battery box and press the power button.
3. Choose your volume setting: LOW volume or HIGH volume.

Operation
1. Play
   - Touch Tommy’s right ear to start a song.
2. Stop
   - Press Tommy’s hat to stop the song.
3. Control
   - Choose from five songs.
   - Push Tommy’s badge to skip to the next song.

Caution
Tommy is not waterproof. Be careful not to get Tommy wet!

① 인터넷에 연결되지 않아도 노래를 재생할 수 있다.
② 사용 전에 두 개의 AA 건전지를 넣어야 한다.
③ 브레이크 누르면 노래가 시작된다.
④ 다른 곳의 노래 중에 선택할 수 있다.
⑤ 방수가 되지 않는다.

28. 2020 Crime & Spy Science Workshop에 관한 다음 문의 내용과 일치하는 것은?

2020 Crime & Spy Science Workshop

Come learn to be a top detective! In this workshop, you will investigate crime scenes and learn skills necessary to become a detective and solve mysteries!

When & Where
• 9 a.m. to 3 p.m. on Tuesday, August 18, 2020
• Conference Room #103, ZBU Student Union

Who: Ages 14 and up

Participation Fee: $20 (insurance not included)

Registration
• Call 555-540-0421, or email spyscience@zbu.edu by Wednesday, July 29, 2020.

Preparations
• Bring comfortable shoes and a bag to carry detective tools.
• Lunch and snacks are provided.

You will learn
• how to find traces of suspects.
• how to manage the scene of a crime.
• how to choose the right tools.

① 이를 문단 진행한다.
② 참가비에 보험이 포함되어 있다.
③ 등록은 이메일로만 할 수 있다.
④ 점심과 간식은 제공되지 않는다.
⑤ 적절한 도구를 선택하는 방법을 배울 것이다.
29. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

People from more individualistic cultural contexts tend to be motivated to maintain self-focused agency or control ① as these serve as the basis of one’s self-worth. With this form of agency comes the belief that individual successes ② depending primarily on one’s own abilities and actions, and thus, whether by influencing the environment or trying to accept one’s circumstances, the use of control ultimately centers on the individual. The independent self may be more ③ driven to cope by appealing to a sense of agency or control. However, people from more interdependent cultural contexts tend to be less focused on issues of individual success and agency and more motivated towards group goals and harmony. Research has shown ④ that East Asians prefer to receive, but not seek, more social support rather than seek personal control in certain cases. Therefore, people ⑤ who hold a more interdependent self-construal may prefer to cope in a way that promotes harmony in relationships.

* self-construal: 자기 구성

30. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Chunking is vital for cognition of music. If we had to encode it in our brains note by note, we’d ① struggle to make sense of anything more complex than the simplest children’s songs. Of course, most accomplished musicians can play compositions containing many thousands of notes entirely from ② memory, without a note out of place. But this seemingly awesome accomplishment of recall is made ③ improbable by remembering the musical process, not the individual notes as such. If you ask a pianist to start a Mozart sonata from bar forty-one, she’ll probably have to ④ mentally replay the music from the start until reaching that bar — the score is not simply laid out in her mind, to be read from any random point. It’s rather like describing how you drive to work: you don’t simply recite the names of roads as an abstract list, but have to construct your route by mentally retracing it. When musicians make a mistake during rehearsal, they wind back to the ⑤ start of a musical phrase (‘let’s take it from the second verse’) before restarting.

* chunking: 덩어리로 나누기  ** bar: 악보의 마디

31. Research with human runners challenged conventional wisdom and found that the ground-reaction forces at the foot and the shock transmitted up the leg and through the body after impact with the ground ________ as runners moved from extremely compliant to extremely hard running surfaces. As a result, researchers gradually began to believe that runners are subconsciously able to adjust leg stiffness prior to foot strike based on their perceptions of the hardness or stiffness of the surface on which they are running. This view suggests that runners create soft legs that soak up impact forces when they are running on very hard surfaces and stiff legs when they are moving along on yielding terrain. As a result, impact forces passing through the legs are strikingly similar over a wide range of running surface types. Contrary to popular belief, running on concrete is not more damaging to the legs than running on soft sand. [3점]

* compliant: 말랑말랑한  ** terrain: 지형

① varied little  ② decreased a lot  ③ suddenly peaked  ④ gradually appeared  ⑤ were hardly generated

32. One of the great risks of writing is that even the simplest of choices regarding wording or punctuation can sometimes ① reveal your hidden intention  ② distort the meaning of the sentence  ③ prejudice your audience against you  ④ test your audience’s reading comprehension  ⑤ create fierce debates about your writing topic

* punctuation: 구두점  ** infinitive: 부정사(不定詞)

① variet little  ② decreased a lot  ③ suddenly peaked  ④ gradually appeared  ⑤ were hardly generated
33. Even when we do something as apparently simple as picking up a screwdriver, our brain automatically _____________.

We can literally feel things with the end of the screwdriver. When we extend a hand, holding the screwdriver, we automatically take the length of the latter into account. We can probe difficult-to-reach places with its extended end, and comprehend what we are exploring. Furthermore, we instantly regard the screwdriver we are holding as “our” screwdriver, and get possessive about it. We do the same with the much more complex tools we use, in much more complex situations. The cars we pilot instantaneously and automatically become ourselves. Because of this, when someone bangs his fist on our car’s hood after we have irritated him at a crosswalk, we take it personally. This is not always reasonable. Nonetheless, without the extension of self into machine, it would be impossible to drive. [34]

* probe: 탐색하다

① recalls past experiences of utilizing the tool
② recognizes what it can do best without the tool
③ judges which part of our body can best be used
④ perceives what limits the tool’s functional utility
⑤ adjusts what it considers body to include the tool

34. A large part of what we see is what we expect to see. This explains why we “see” faces and figures in a flickering campfire, or in moving clouds. This is why Leonardo da Vinci advised artists to discover their motifs by staring at patches on a blank wall. A fire provides a constant flickering change in visual information that never integrates into anything solid and thereby allows the brain to engage in a play of hypotheses. On the other hand, the wall does not present us with very much in the way of visual clues, and so the brain begins to make more and more hypotheses and desperately searches for confirmation. A crack in the wall looks a little like the profile of a nose and suddenly a whole face appears, or a leaping horse, or a dancing figure. In cases like these the brain’s visual strategies are _____________. [36]

* flicker: 흔들리다

① ignoring distracting information unrelated to visual clues
② projecting images from within the mind out onto the world
③ categorizing objects into groups either real or imagined
④ strengthening connections between objects in the real world
⑤ removing the broken or missing parts of an original image

35. 다음 글에서 전체 요약과 관계 없는 문장은?

One of the most widespread, and sadly mistaken, environmental myths is that living “close to nature” out in the country or in a leafy suburb is the best “green” lifestyle. Cities, on the other hand, are often blamed as a major cause of ecological destruction — artificial, crowded places that suck up precious resources. Yet, when you look at the facts, nothing could be farther from the truth. ① The pattern of life in the country and most suburbs involves long hours in the automobile each week, burning fuel and pumping out exhaust to get to work, buy groceries, and take kids to school and activities. ② City dwellers, on the other hand, have the option of walking or taking transit to work, shops, and school. ③ The larger yards and houses found outside cities also create an environmental cost in terms of energy use, water use, and land use. ④ This illustrates the tendency that most city dwellers get tired of urban lives and decide to settle in the countryside. ⑤ It’s clear that the future of the Earth depends on more people gathering together in compact communities.

* compact: 밀집한

[36~37] 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

36. Studies of people struggling with major health problems show that the majority of respondents report they derived benefits from their adversity. Stressful events sometimes force people to develop new skills, reevaluate priorities, learn new insights, and acquire new strengths.

(A) High levels of adversity predicted poor mental health, as expected, but people who had faced intermediate levels of adversity were healthier than those who experienced little adversity, suggesting that moderate amounts of stress can foster resilience. A follow-up study found a similar link between the amount of lifetime adversity and subjects’ responses to laboratory stressors.

(B) Intermediate levels of adversity were predictive of the greatest resilience. Thus, having to deal with a moderate amount of stress may build resilience in the face of future stress.

(C) In other words, the adaptation process initiated by stress can lead to personal changes for the better. One study that measured participants’ exposure to thirty-seven major negative events found a curvilinear relationship between lifetime adversity and mental health.

* resilience: 회복력

① (A) – (C) – (B) ② (B) – (A) – (C) ③ (B) – (C) – (A) ④ (C) – (A) – (B) ⑤ (C) – (B) – (A)
The fruit ripening process brings about the softening of cell walls, sweetening and the production of chemicals that give colour and flavour. The process is induced by the production of a plant hormone called ethylene.

(A) If ripening could be slowed down by interfering with ethylene production or with the processes that respond to ethylene, fruit could be left on the plant until it was ripe and full of flavour but would still be in good condition when it arrived at the supermarket shelf.

(B) In some countries they are then sprayed with ethylene before sale to the consumer to induce ripening. However, fruit picked before it is ripe has less flavour than fruit picked ripe from the plant. Biotechnologists therefore saw an opportunity in delaying the ripening and softening process in fruit.

(C) The problem for growers and retailers is that ripening is followed sometimes quite rapidly by deterioration and decay and the product becomes worthless. Tomatoes and other fruits are, therefore, usually picked and transported when they are unripe. [A]

* deterioration: (동의어) 저하

① (A) – (C) – (B)  ② (B) – (A) – (C)
③ (B) – (C) – (A)  ④ (C) – (A) – (B)
⑤ (C) – (B) – (A)

38. 39.

Compounding the difficulty, now more than ever, is what ergonomists call information overload, where a leader is overrun with inputs — via e-mails, meetings, and phone calls — that only distract and confuse her thinking.

Clarity is often a difficult thing for a leader to obtain. Concerns of the present tend to seem larger than potentially greater concerns that lie farther away. (①) Some decisions by their nature present great complexity, whose many variables must come together a certain way for the leader to succeed. (②) Alternatively, the leader’s information might be only fragmentary, which might cause her to fill in the gaps with assumptions — sometimes without recognizing them as such. (③) And the merits of a leader’s most important decisions, by their nature, typically are not clear-cut. (④) Instead those decisions involve a process of assigning weights to competing interests, and then determining, based upon some criterion, which one predominates. (⑤) The result is one of judgment, of shades of gray; like saying that Beethoven is a better composer than Brahms. [A]

* ergonomist: 인간 공학자  ** fragmentary: 단편적인

When the team painted fireflies’ light organs dark, a new set of bats took twice as long to learn to avoid them.

Fireflies don’t just light up their behinds to attract mates, they also glow to tell bats not to eat them. This twist in the tale of the trait that gives fireflies their name was discovered by Jesse Barber and his colleagues. The glow’s warning role benefits both fireflies and bats, because these insects taste disgusting to the mammals. (①) When swallowed, chemicals released by fireflies cause bats to throw them back up. (②) The team placed eight bats in a dark room with three or four fireflies plus three times as many tasty insects, including beetles and moths, for four days. (③) During the first night, all the bats captured at least one firefly. (④) But by the fourth night, most bats had learned to avoid fireflies and catch all the other prey instead. (⑤) It had long been thought that firefly bioluminescence mainly acted as a mating signal, but the new finding explains why firefly larvae also glow despite being immature for mating.

* bioluminescence: 생물 발광  ** larvae: larva(애벌레)의 복수형

Some environments are more likely to lead to fossilization and subsequent discovery than others. Thus, we cannot assume that more fossil evidence from a particular period or place means that more individuals were present at that time, or in that place. It may just be that the circumstances at one period of time, or at one location, were more favourable for fossilization than they were at other times, or in other places. Likewise, the absence of hominin fossil evidence at a particular time or place does not have the same implication as its presence. As the saying goes, ‘absence of evidence is not evidence of absence’. Similar logic suggests that taxa are likely to have arisen before they first appear in the fossil record, and they are likely to have survived beyond the time of their most recent appearance in the fossil record. Thus, the first appearance datum, and the last appearance datum of taxa in the hominin fossil record are likely to be conservative statements about the times of origin and extinction of a taxon.

* subsequent: 다음의  ** hominin fossil: 인류 화석  *** taxa: taxon(군류군)의 복수형

Since fossilization and fossil discovery are affected by environmental conditions, the fossil evidence of a taxon cannot definitely confirm its population size or the times of its appearance and extinction.

(A)  (B)  (A)  (B)
① experimental  ------ confirm  ② experimental  ------ reveal
③ environmental------ clarify  ④ environmental------ conceal
⑤ accidental  ------ mask
In many mountain regions, rights of access to water are associated with the possession of land—until recently in the Andes, for example, land and water rights were (a) combined so water rights were transferred with the land. However, through state land reforms and the development of additional sources of supply, water rights have become separated from land, and may be sold at auction. This therefore (b) favours those who can pay, rather than ensuring access to all in the community. The situation arises, therefore, where individuals may hold land with no water. In Peru, the government grants water to communities separately from land, and it is up to the community to allocate it. Likewise in Yemen, the traditional allocation was one measure (tasahh) of water to one hundred ‘ilmah of land. This applied only to traditional irrigation supplies—from runoff, wells, etc., where a supply was (c) guaranteed. Water derived from the capture of flash floods is not subject to Islamic law as this constitutes an uncertain source, and is therefore free for those able to collect and use it. However, this traditional allocation per unit of land has been bypassed, partly by the development of new supplies, but also by the (d) decrease in cultivation of a crop of substantial economic importance. This crop is harvested throughout the year and thus requires more than its fair share of water. The economic status of the crop (e) ensures that water rights can be bought or bribed away from subsistence crops.

* irrigation: 관개 ** bribe: 매수하다 *** subsistence crop: 생계용 작물

41. The correct answer is (D)

42. Among (a)–(e) sentences where the question stem applies, which one does not? [3 marks]
   1. (a)  2. (b)  3. (c)  4. (d)  5. (e)

43. In the passage (A) above, which sentence in the passage (B) is most closely related? [3 marks]
   1. (a)  2. (b)  3. (c)  4. (d)  5. (e)

44. Among (a)–(e) statements about water, which one is not most closely related? [3 marks]
   1. (a)  2. (b)  3. (c)  4. (d)  5. (e)

45. What is the best order of the statements in the passage (C)? [3 marks]
   1. (a)  2. (b)  3. (c)  4. (d)  5. (e)

(A) "Congratulations!" That was the first word that Steven saw when he opened the envelope that his dad handed to him. He knew that he would win the essay contest. Overly excited, he shouted, "Hooray!" At that moment, two tickets to Ace Amusement Park, the prize, slipped out of the envelope. He picked them up and read the letter thoroughly while sitting on the stairs in front of his house. "Wait a minute! That's not my name!" (a) he said, puzzled. The letter was addressed to his classmate Stephanie, who had also participated in the contest.

(B) Once Steven had heard his dad’s words, tears started to fill up in his eyes. “I was foolish,” Steven said regretfully. He took the letter and the prize to school and handed them to Stephanie. He congratulated her wholeheartedly and she was thrilled. On the way home after school, his steps were light and full of joy. That night, his dad was very pleased to hear what he had done at school. “(b) I am so proud of you, Steven,” he said. Then, without a word, he handed Steven two Ace Amusement Park tickets and winked.

(C) “If I don’t tell Stephanie, perhaps she will never know,” Steven thought for a moment. He remembered that the winner would only be notified by mail. As long as he kept quiet, nobody would know. So he decided to sleep on it. The next morning, he felt miserable and his dad recognized it right away. “What’s wrong, (c) Son?” asked his dad. Steven was hesitant at first but soon disclosed his secret. After listening attentively to the end, his dad advised him to do the right thing.

(D) Reading on, Steven realized the letter had been delivered mistakenly. "Fortunately," it should have gone to Stephanie, who was the real winner. (d) He looked at the tickets and then the letter. He had really wanted those tickets. He had planned to go there with his younger sister. Steven was his sister’s hero, and he had bragged to her that he would win the contest. However, if she found out that her hero hadn’t won, she would be terribly disappointed, and (e) he would feel ashamed.

(E) The letter had made Steven think of Stephanie, who was the main character in the story. Stephanie was one of Steven’s classmates, and they had participated in the same essay contest. However, Steven knew that Stephanie had written a better essay than he did. He couldn’t believe that he had won the prize. As he opened the envelope, he saw two tickets to Ace Amusement Park. "Congratulations!" That was the first word that Steven saw when he opened the envelope that his dad handed to him. He knew that he would win the essay contest. Overly excited, he shouted, "Hooray!" At that moment, two tickets to Ace Amusement Park, the prize, slipped out of the envelope. He picked them up and read the letter thoroughly while sitting on the stairs in front of his house. "Wait a minute! That’s not my name!" (a) he said, puzzled. The letter was addressed to his classmate Stephanie, who had also participated in the contest.
