13. 대화를 듣고, 남자의 마지막 말에 대한 여자의 응답으로 가장 적절한 것을 고르시오. [3점]

Woman:
① I'm sorry. The campaign is already over.
② Sure. More eyes will find more good spots.
③ All right. I'll think about joining the campaign.
④ Never mind. I'd better go and finish my project.
⑤ I agree. Angles are important when taking selfies.

14. 대화를 듣고, 여자의 마지막 말에 대한 남자의 응답으로 가장 적절한 것을 고르시오. [3점]

Man:
① That's why I don't let her eat cookies.
② You should've checked the tips in the article.
③ You need to calm down first and tell me why.
④ I'm sorry. I promise that I won't tell a lie again.
⑤ I got it. I'll keep that in mind next time she tells a lie.

15. 다음 상황 설명을 듣고, Kate가 Troy에게 할 말로 가장 적절한 것을 고르시오.

Kate:
① I think you should take the bus instead of a taxi.
② I'll give you a ride to your office for today.
③ Let's just hope the subway will move again.
④ The subway would be faster than the car.
⑤ You can use this new app to call a taxi.

16. 남자가 하는 말의 주제로 가장 적절한 것은?
① eating tips for increasing productivity
② ways to avoid eating unhealthy snacks
③ importance of having breakfast regularly
④ late night eating habits that lead to obesity
⑤ relationships between diet and mood change

17. 연금면 식품이 아닌 것은?
① yogurt ② cereal ③ cheese ④ bananas ⑤ nuts

21. 다음 글의 요지로 가장 적절한 것은?

A new development may take years to evolve. If people are only informed of a new proposal in its final stages, their role is often limited to the negative one of rejecting it. Their protests are then seen by planners and developers as an expensive nuisance, so the public become the ‘enemy’. Many people would like their voices to be heard from the initial stages of a proposed new development, instead of at the last stages of an application. Some architects and developers see this as a threat and insult to their professional skills, rather than a two-way process, beneficial to all parties. Of course the public cannot design a building, but its involvement at an early stage adds to the information available, and replaces a confrontational ‘them and us’ situation by a democratic process of participation and consultation. This situation is now changing as the importance of public consultation becomes increasingly recognised.

③ 환경 경계를 활용하는 것이 건축비 절감에 효과적이다.
④ 개발 과정에서 지역 주민 간 갈등이 심화하는 경향이 있다.
⑤ 거주자의 개별적 요구를 수용하는 건축 설계가 증가하고 있다.

22. 다음 글의 주제로 가장 적절한 것은?

Birds, as a whole group, are more sensitive to changes in their environment than other animals, so when they start falling off perches we should all be troubled. They are in the forward-most trench of nature’s resistance against the relentless attrition of environmental degradation. Our birds are nature’s early warning system and the scientists are telling us that if we don’t start acting on their distress signals, it won’t be long before the rest of the animal world is overrun as well. The populations of many species are declining rapidly because habitats are being destroyed or undermined, food sources are disappearing and, tricked by the increasingly weird and unstable weather, the birds’ migration and breeding patterns are changing. In short, birds are confused and under stress. Just because you can hear your robins, goldfinches, and sparrows chirping away happily in the garden every morning, don’t be fooled into thinking that all is well in ‘birdworld’.

Appealing though it might be to offload the responsibility for teaching our students basic knowledge to their elementary school teachers or to the Internet, the research of cognitive psychologists who study learning and the basic study habits of most students suggest that we cannot do this. One of our first and most important tasks as teachers is to help students develop a rich body of knowledge in our content areas—without doing so, we handicap considerably their ability to engage in cognitive activities like thinking and evaluating and creating. As cognitive psychologist Daniel Willingham argued, you can’t think creatively about information unless you have information in your head to think about. “Research from cognitive science has shown,” he explained, “that the sorts of skills that teachers want for their students—such as the ability to analyze and think critically—require extensive factual knowledge.” We have to know things, in other words, to think critically about them.

① Critical Thinking: A Must for Creativity
② Factual Knowledge Is No Longer Required
③ Does Learning Happen Only in the Classroom?
④ Knowledge: A Cornerstone for Cognitive Activities
⑤ Physical Activities Enhance Cognitive Development

24. 다음 도표의 내용과 일치하지 않는 것은?

The above graph shows what type of content a sample of 1,091 online consumers from 11 countries in 2016 tended to read or watch thoroughly, and what they tended to skim.

① The percentage of people who consumed videos thoroughly was the highest, followed by social media posts.
② Less than thirty percent of the respondents answered they read or watched blogs and podcasts thoroughly, respectively.③ Blogs, social media posts, and news articles were top three contents which were most likely to be skimmed by online consumers.④ Videos showed the largest percentage point gap between "Consume thoroughly" and "Skim," whereas research content showed the smallest.
⑤ The percentage of respondents who consumed news articles thoroughly was more than twice that of respondents who consumed podcasts thoroughly.

Nicolas Appert was born in Châlons-sur-Marne, on the edge of France’s Champagne region, in 1749. He became an accomplished chef and served in the kitchens of various noblemen before setting up as a confectioner in Paris in 1781. In this line of work he was necessarily aware of the use of sugar to preserve fruit, and he wondered whether it could be used to preserve other foods. As his interest in food preservation grew he began to experiment with storing food in sealed champagne bottles. In 1795 he moved to the village of Ivry-sur-Seine, where he began to offer preserved foods for sale, and in 1804 he set up a small factory to produce them. By this time some of his preserved food had been tested by the French navy, which was impressed by its quality. Appert had devised his methods solely by experiment and had no idea why it worked.

Greenwoods Business Start-up Academy

Greenwoods Business Start-up Academy for teens is a one-week residential program that offers students hands-on, real world training in “how to start a business.”

- Dates: January 8–14, 2018
- Participants: high school students (grades 9–12)
- Fee: $500 for living on campus for one week including room, board, books, field trips and classes

Additional Information
- On the last day, the business plan competition is held, and the winning team obtains $1,500.
- This program is limited to only 100 high school students.

Register now at the Greenwoods University website. Questions? Call 514-234-9876 or email at s_christen@gwu.edu.

People seeking legal advice should be assured, when discussing their rights or obligations with a lawyer, ① which the latter will not disclose to third parties the information provided. Only if this duty of confidentiality is respected ② will people feel free to consult lawyers and provide the information required for the lawyer to prepare the client’s defense. Regardless of the type of information disclosed, clients must be certain that it will not be used against them in a court of law, by the authorities or by any other party. It is generally considered to be a condition of the good functioning of the legal system and, thus, in the general interest. Legal professional privilege is ④ much more than an ordinary rule of evidence, limited in its application to the facts of a particular case. It is a fundamental condition on which the administration of justice as a whole ⑤ rests.

Root Garden Club

Join our club and grow your own garden!
This club is open to any children aged 7–15.

- Place: Rainbow Cottage at Oldwich
- Time: You can access your garden anytime.
- Class: We will hold monthly classes the 3rd Saturday of each month. Classes will be approximately one hour long.

Details
- Each garden space is automatically watered, so you don’t have to come to water your garden.
- The classes will alternate between cooking lessons and gardening lessons.
- Prior to the cooking lessons, we will email out a list of fruits, vegetables, or supplies that you will need to bring.

For more information, visit our website at www.rootgarden.org.
29. In literature as distinct from journalism, the ablest writers will never assume that the bare bones of a story can be (A) **enough**/ **insufficient** enough to win over their audience. They will not suppose that an attack or a flood or a theft must in and of itself carry some intrinsic degree of interest which will cause the reader to be appropriately moved or outraged. These writers know that no event, however shocking, can ever guarantee (B) **detachment**/ **involvement**; for this latter prize, they must work harder, practicing their distinctive craft, which means paying attention to language and keeping a tight rein on pace and structure. In certain situations, creative writers may even choose to (C) **emphasize**/ **sacrifice** strict accuracy, and rather than feel that they are thereby carrying out a criminal act, they will instead understand that falsifications may occasionally need to be committed in the service of a goal higher still than accuracy.

(A) **enough**
(B) **detachment**
(C) **emphasize**

29. **استخدام التعبير بشكل صحيح في الجمل**

A middle-aged man once asked a young mindfulness teacher for meditation instructions in plain language. He suggested that ① **the man** carve out five or ten minutes every day to sit comfortably or lie down and focus on his breathing. When thoughts came to mind, the young teacher told him to ignore them and go back to focusing on his breath. Although the middle-aged man remembered the instructions of ② **his teacher**, he couldn’t follow them. When his mind got busy, he was sucked into a mental loop of analyzing his problems. When ③ **he wasn’t thinking**, he’d get bored and zone out. Either way, ④ **this hopeful new meditator** didn’t feel that his time was well spent. When he was thinking and meditating, he figured he’d be better off sitting at his desk, and when he zoned out while meditating, ⑤ **he figured he’d be better off daydreaming on a long chair in the backyard.**

31. One characteristic of people who have achieved peace of mind is their independence. They trust their instincts. Nobody can tell them what to think if their inner voices say otherwise. Brendan O’Regan tells about a doctoral student who placed an ad in an Idaho newspaper asking if anyone within a 300-mile radius had experienced a remission. Twenty-five people replied. She noticed that many of them were farmer’s wives who had in common a strong faith in

- their own judgment
- their land and home
- medical development
- social security system
- agricultural technology
People change over time, often for the better. Maturity, wisdom, patience, and many other strengths can result from the gradual accumulation of life experiences. But do these qualities have to develop slowly? Researcher Timothy Carey and colleagues recently examined the idea that

They conducted structured interviews with people who had just finished psychotherapy. Reports of aha moments abounded. One interviewee said that he could “visualize the point” at which he changed; another said, “I could actually hear it.” Many of them could identify the moment at which they had their realizations, such as in a swimming pool with a spouse or in a particular meeting with a therapist. Some used familiar metaphors to describe their ahas, such as a light being turned on, a button being pressed, a click, or a “ping” and then it was like I could see things clearly.” Personal growth doesn’t have to be a glacial process. As physician-author Oliver Wendell Holmes, Sr., wrote, “A moment’s insight is sometimes worth a life’s experience.” [33]

1. human attention span is surprisingly short
2. one’s strengths and weaknesses are not fixed
3. insights can be shortcuts to positive personal change
4. life experiences become more meaningful when shared
5. a single standard cannot measure one’s physical growth

Renewal and reform always depend on a capacity for going backwards to go forward. Key to this process is a search within one’s own mind for a model according to which reformed practice can be organized. Architects have long appealed to a primitive hut as just such a model. It is a structure thought to provide access as close to the first principles of architecture as it is possible to get, yet traces of this structure exist nowhere other than in the mind’s eye of the architect searching for it. Nonetheless, absence of the primitive hut from physical reality does little to diminish its importance for the renewal of present practices. If a desired (or required) thing resides in paradise, and no current map indicates its location, getting to it will only be possible via dreams and wishes. Reconstructions of it will necessarily be interpretations based on _____________ Even though it is impossible to get there, returning to paradise nonetheless remains a reasonable destination for the memory, still able, by way of example, to fulfill its promise to the here and now. [33]

1. regularities within physical reality beyond the origin
2. distortions due to the ignorance of evaluation models
3. varieties of geographical locations of modern structures
4. potentials that arise from the daring cutoff from the past practices
5. resemblances modeled after a non-existent object forever beyond our reach

Large satellites for collecting solar power and transmitting it to the Earth have been the subject of much study. Their potential is vast indeed. ① The energy from the Sun that reaches the Earth over the course of just three days is equal to the energy in the fossil fuels needed to keep the human race supplied with power for 100 years at the present rate of consumption. ② Many engineering problems of transmitting the power back to the Earth remain unsolved, and it remains unclear if and when solar power will become commercially competitive. ③ A satellite of just 155 miles (250 km) in diameter could supply all of our present energy needs, assuming 10% overall efficiency, with a very low carbon footprint. ④ Solar panels in orbit are always in sunlight, they can always point directly at the Sun, and the radiation from the Sun is not reduced by atmospheric absorption. ⑤ As a result, the energy intake for cells in orbit is on average about ten times greater than that of terrestrial ones.

The evolution in the West from the late seventeenth century onwards of the idea of the aesthetic in music produced musical forms which were specifically intended to be listened to by a knowledgeable public and performed only by experts and masters.

(A) To this extent, it can be claimed that most cultures, if not all of them, have both communal music-making where everyone participates and where the notion of musical talent is irrelevant, and special ritual and ceremonial music where only the specially talented and trained perform, and where the rest listen and participate as observers.

(B) In addition to such events, there was also communal music-making, especially at festivals such as the Winter Solstice, Harvest time, Spring time, and other secular celebrations where everyone participated. Music in the Christian church is similarly organised with communally sung hymns, anthems, and other liturgical items sung by the specially trained choir.

(C) That is, specially trained musicians performed and the audience was expected to contemplate the musical aesthetic as they listened. It is from this tradition that the instrumental and vocal forms of modern western music have evolved. [33]

* secular: 세속적인  ** liturgical: 예배용의

① (A) - (C) - (B)  ② (B) - (A) - (C)
③ (B) - (C) - (A)  ④ (C) - (A) - (B)
⑤ (C) - (B) - (A)
37. The force of gravity is always attractive. It is a force pulling together any two things that have mass. Any amount of mass will cause the attraction, but the more mass the stronger the force.

(A) That’s because objects always have a positive amount of mass. There is no such thing as negative mass. It’s not like electric charge that comes in both positive and negative values.

(B) That’s why a brick is heavier than a balloon, heavier and harder to hold or move in opposition to the force of gravity. The force also depends on the distance between the objects: the greater the distance the weaker the force.

(C) The attraction gets weaker and weaker as the objects get further apart, but it never disappears altogether. The force never goes to zero. And it never pushes things away.

① (A) – (C) - (B)  ② (B) – (A) – (C)  ③ (B) – (C) – (A)  ④ (C) – (A) – (B)  ⑤ (C) – (B) – (A)

39. In order to lighten the weight of the logs to be shifted, some inventive soul cut two cross sections out of a log and put a pole through the middle of both, making a wheel and axle.

The wheel has been around five thousand years, more or less, so archaeologists tell us. (①) Someone of our forefathers early on noticed that a round log was easier to roll than to carry. (②) The next step was to figure out that heavy objects could be moved by rolling them on three logs, keeping two logs under the load and shifting the log that rolled out the back up to the front. (③) The next step was to fit a platform on the axle in such a way that the axle stayed in one place and the wheels turned round and round. (④) This ancient inventor had thus invented the wagon that five thousand years later became a modern car. (⑤) The wheel business began, speculatively, in Mesopotamia and from there spread to the rest of the Old World—Europe, Africa, and Asia.

* axle: (마디의) 굴데, 자축

40. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Perspective is defined as the art of picturing objects as they appear to the eye. We have been taught to represent distant objects as smaller, thereby giving the illusion of depth. But are they really smaller? The child knows that the man fifty feet away is just as big as the one five feet away. So why draw one smaller than the other? The child’s drawings are not reproductions of an optical image. He uses size to impart emphasis and importance. He draws his concept of the object. His drawing is consequently more meaningful than a faithful reproduction. Objectivity can be achieved by photography. Many true artists use distortion, exaggeration, or reduction to essentials. The child draws the man bigger than the tree in his front yard because to him the man is more significant. For the same reason, we see the person bigger than the house.

Children’s drawings ____ (A) ____ the expression of depth, and the size of an object in the drawings reveals its ____ (B) ____ in the children’s mind.

(A) (B) (A) (B)
① lack ... significance  ② lack ... availability  ③ reflect ... accuracy  ④ reflect ... significance  ⑤ highlight ... accuracy

43 - 45] 다음 글을 읽고, 문을 답하십시오.

(A)

Mark’s brother, Reuben, got a new coat, so Mom
decided to make Mark’s winter coat out of Reuben’s old
one. She took it apart carefully, cleaned and brushed
the pieces and soon there was a nice new coat for Mark.
He liked the coat very much, but he did want new buttons
on it. But Mom said, “These are good buttons and look
fine just as they did on Reuben’s coat.” He protested but
when Mom had her mind made up, there was no point in
wasting time trying to change it.

(B)

Several days passed after the incident, and the family
was ready for a trip to town. Of course, Mark was
wearing his new coat, and as he walked in front of Nellie,
(a) she reached out again and buttressed her head.
This time, Nellie was chewing on one of his coat buttons.
What’s the matter with that horse? Mark, have you been
teasing her?” asked Mom. “No, I haven’t,” he said.

(C)

One evening Mom said to Mark, “Put on your coat and
run out to the barn. Ask Dad to bring some eggs.” He
had been a frequent visitor to the barn, but the animals
never paid much attention to him. This evening,
however, was different. Just outside the barn door stood
Nellie, their family horse. Before he could enter, (b) she
banged her head against his stomach, and he sat down
hard. Reuben and Dad came running when they heard
Mark scream. Reuben said to Dad, “Whatever got into
that horse?” “I guess Mark startled (c) her,” replied Dad.

(D)

Reuben came up with the answer. He said, “Nellie only
goes after Mark when he has that coat on. I think
Nellie remembers those buttons when they were on my coat.
I trained (d) her to shake the front of my coat to get
sugar. I think that’s what she wants.” Mom was doubtful,
though. However, when Nellie continued to make life
miserable for Mark whenever he wore that coat, (e) she
began to change her mind. Finally one day she said, “I
believe Reuben is right. Maybe I’d better change the
buttons.” So Mark’s wish came true after all.
