CN70/CN70e
Ultra-Rugged Mobile Computers

Honeywell CN70 and CN70e Ultra-Rugged Mobile Computers achieve true functional agility with the perfect balance of ruggedness, duty cycle and ergonomics. The CN70 is optimal for mobile field service and transportation workers who need power and performance in a compact form factor. The CN70e offers the same power-packed computing and comes with a larger keypad design, making it ideal for delivery environments where workers may be wearing gloves or have more data input-intensive applications. Extend the use of the CN70 and CN70e mobile computers into hazardous locations with the non-incendive certified (Div. 2) CN70 and CN70e.

The CN70 and CN70e mobile computers offer features that save valuable seconds and deliver unparalleled reliability. Honeywell’s high-performance imager provides optimal barcode scanning capabilities even in low-light scanning environments, and unmatched motion tolerance and laser aiming for the snappiest speeds. The no-compromise design of the CN70 and CN70e mobile computers includes an all-light visible VGA display, high-durability Gorilla® Glass touch panel and virtually indestructible keypad technology to ensure that they stay in workers’ hands instead of the repair depot. The 70 Series also includes an industrial-grade processor that offers faster performance with lower power consumption.

The CN70 and CN70e mobile computers extend their no-compromise design to radio connectivity as well. Their wide-area solutions feature a Flexible Network data-only radio that operates on any type of network, offering switch-on-the-fly network selection capability and eliminating the need for multiple pools of devices dedicated to one network.

The CN70 and CN70e mobile computers’ unique device health reporting capability provides insight to enable mobile workers and IT administrators to monitor and prevent issues before they impact operations. Key subsystems, including scanning, communications and battery life, can be monitored by either the mobile worker via an on-board dashboard utility or remotely through the Honeywell SmartSystems™ Foundation management console.

The CN70 and CN70e mobile computers are just two models out of four available in the 70 Series family. Each model offers a purpose-built form factor and includes choices of radios, keypads, imagers, software and services. This provides the ability to tailor a solution specific to each application area within your environment, supporting the preferences and needs of your employees without the expense of supporting multiple device platforms.
