

The 26<sup>th</sup> Annual  
ACM International Collegiate  
Programming Contest  
ASIA Regional - Taejon

Practice Problem A  
Word Reversal  
Input: word.in

For each list of words, print a line with each word reversed without changing the order of the words. Each word consists of English letters only.

**Input**

The input consists of  $T$  test cases. The number of test cases ( $T$ ) is given in the first line of the input file. Each test case consists of a single line: each line contains a list of words separated by one space.

**Output**

For each test case, print the output on one line.

**Sample Input**  
(word.in)

**Output for the Sample Input**
