

Chair

By Perry Bailey 1997

1. Fold over then unfold.

2. Fold both sides to center.

3. Fold both sides in to the center again, then unfold and turn over.

4 Fold up to around the center of the model turn over.

5. Fold up about half way to the previously noted center, This will bring the flap from the back to the front.

6. Fold up the flap, or unfold it according to your perspective.

7. Fold a little of the top layer down for neatness. The precrease the top layer.

8. Fold the back of the chair behind while bringing the front of the chair down to form the seat.

9. The front should look like this. Turn it around.

10. From the back it should look like this, note the two pockets at the bottom when you fold the top down tuck it into the pockets to lock it into shape.

11. Finished chair.

Now figure out a which point a simple reversal would hide the lines shown in the seat and back of the chair!
